Triumphs in Early Autism Treatment

Ennio Cipani, PhD, Editor

"Both parents and professionals who work with young children with autism should read this book."

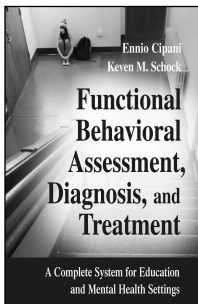

—**Temple Grandin**, PhD, author of *Thinking in Pictures*

"Dr. Cipani's work is a wonderful addition to the literature on early intervention for autism."

—**Catherine Maurice**, PhD, author of *Let Me Hear Your Voice*

The groundbreaking treatment ABA has allowed numerous children to reach the "best outcome status," a level of normal intellectual and educational functioning. This book is the first to document "best outcome" case studies using exclusively ABA treatment. The contributors provide seven "best outcome" cases of autistic children given ABA treatment, and provide both parents and clinicians with the most essential information on the history and effectiveness of ABA.

Functional Behavioral Assessment, Diagnosis, and Treatment

A Complete System for Education and Mental Health Settings

Ennio Cipani, PhD;
Keven M. Schock, MA, BCBA

"There are three or four other texts on functional analysis. I've examined every one and Cipani's is clearly the best. . . . Were I teaching a seminar to clinicians, I think the text would be perfect."

—**Brian A. Iwata**, PhD, University of Florida

This practical book, written both for clinician/educators and high-level students, creates a function-based behavioral diagnostic classification system, the first of its kind. Cipani and Schock present state-of-the-art treatment protocols and address the full range of behaviors, including aggression, self-injury, stereotypic behavior, tantrums, and non-compliance.
